

Home Learning: Planning for Success

Home learning plays an important part in our pupils' success and in their learning journey. The first step to keeping up with home learning, and completing it effectively, is being able to use a planner properly. This year we have changed the planner to make the recording of home learning easier and more efficient. Our focus is on giving pupils tasks which promote thinking and ensuring that pupils complete assignments on time to a good standard.

Tick when a subject sets you Home Learning.

Record the 'Due Date' for when it is to be completed by.

Look on Microsoft Teams to find out the details and instructions for the assignment.

Subject	Homework set and logged online	Due Date	Completed	Notes
Art	<input checked="" type="checkbox"/>	Tue 8 th Sep	<input checked="" type="checkbox"/>	
Drama				
English				
Geography				
History				
Languages				

Tick off Home Learning tasks once completed. This will be a useful checklist.

Use the Notes Section to write down any key advice or things to remember to bring to class. Remember the detail will be on TEAMS, so you might not need to write anything.

Top Tips for Helping with Home Learning

- Help your child to plan and stick to a weekly home learning routine.
- Agree with the family where your child does their home learning, and try to keep it free from distraction.
- Compare your child's homework to the instructions on teams and encourage them to tick them off once they are completed.
- Have a go! It's really important that your child attempts the homework. It is ok to make mistakes... that is how we learn!
- Ensure home learning is completed and put in their homework folder or has uploaded the work or a photo of it to teams.

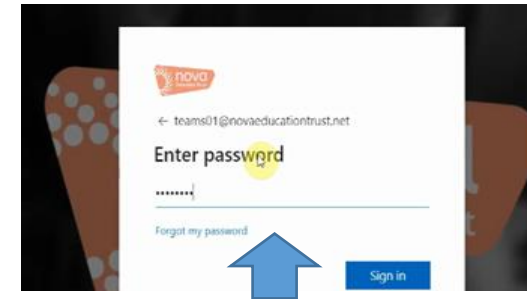

USE **MICROSOFT TEAMS** TO CHECK WHAT HOMEWORK HAS BEEN SET!

How to access **Microsoft Teams**:

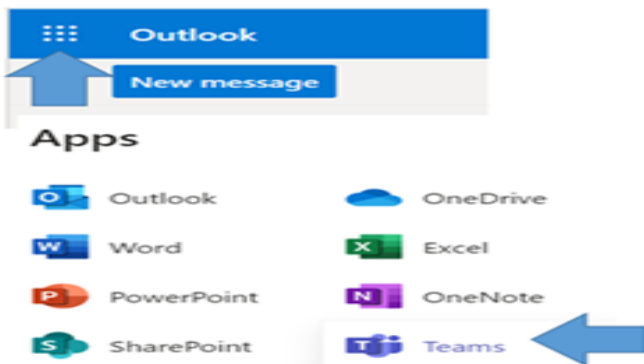

Step 1: Go to the Toot Hill School Website.

Step 2: Click the computer symbol to access your Office365 account. Sign in entering your email and then your password.

Step 3: Once on their email, pupils click on the 9 squares button which is the App launcher and select **Teams**.

Step 4: To view your assignment simply click on the class on the Teams home page and then click assignments at the top. Lastly, simply click on the assignment to open it.
